

MOHAMMED FOAD

Senior Full Stack Engineer (.Net | Angular | AI-Driven Systems)

SUMMARY

Senior Full Stack Engineer with 5+ years of experience designing and delivering scalable, secure, and high-performance enterprise web applications. Specialized in .NET Core, Angular, and AI-driven systems within healthcare and enterprise domains. Strong background in Clean Architecture, SOLID principles, distributed systems, and cloud-native development. Proven ability to optimize system performance, lead refactoring initiatives, and deliver intelligent automation solutions that improve operational efficiency. Experienced in collaborating with cross-functional teams to translate complex business and medical requirements into scalable technical solutions.

EDUCATION

- Bachelor of Computers and Information**
Computer Science Department
At: Faculty of Computers and Information, Computer science department, MU.
Cumulative grade: good
 Sep. 2016 – Aug. 2020

EXPERIENCE

- Senior Full stack developer**
At: TachyHealth
 July. 2023 - ongoing
 - Led large-scale frontend refactoring initiative implementing lazy loading and modular architecture, reducing application load time by 35% and improving maintainability.
 - Re-architected API Gateway layer, optimizing JSON transformation and third-party integrations, reducing response processing time by 40%.
 - Spearheaded the development of AiCode, an AI-powered medical coding platform automating medical record processing into structured coding outputs.
 - Designed AI-assisted workflows integrating LLM-based text interpretation and validation mechanisms.
 - Built and delivered Oncology System, a full-scale web-based platform for managing oncology pharmacies and infusion centers.
 - Designed backend architecture from scratch using Clean Architecture and SOLID principles.
 - Improved code quality by enforcing peer review standards and refactoring legacy modules, reducing bug rate in production releases.
 - Collaborated closely with medical domain experts to translate complex clinical workflows into scalable technical implementations. Led the gateway refactoring, optimizing JSON handling and data manipulation for streamlined data processing and code maintainability.

- **Senior Full stack developer**

At: FortTeck

📅 Jan. 2021 - Jul. 2023

- Developed Homeless, a humanitarian platform facilitating refugee accommodation management across Africa.
 - Contributed to Counselling, an educational administration system managing school workflows and appointments.
 - Played a key role in building Bond, an enterprise workflow system handling complex operational processes (car imports, spare parts management).
 - Built HR management modules including leave workflows and employee lifecycle tracking.
 - Delivered scalable, business-oriented solutions in collaboration with product and design teams.
-

INTERNSHIPS

- **MEARN Stack Training**

At: ITI (Information Technology Institute).

📅 Jan. 2021 - April 2021 📍 Assuit

Gained good knowledge in JavaScript fundamentals, ES6, Node.js and MongoDB

Projects:

1- Upwork-clone

Developed this website using modern technologies:- React, Tailwindcss, Redux, moment, Formik, nodemailer, NodeJS, API, JWT

2- Movix

Developed this website using modern technologies:- Angular, Bootstrap , NodeJS, GraphQL, Apollo, API

3- twitter-clone

Developed this website using modern technologies:- Bootstrap , Local Storage, JQuery

4- Portfolio

Developed this website using modern technologies: - Bootstrap, JQuery, Canvas, SVG

- **.Net MVC Training**

At: ITI (Information Technology Institute).

📅 Jul. 2019 - Aug. 2019 📍 Minya

Gained good knowledge in C# fundamentals, LINQ, MVC, Ajax and SQL

Projects:

1- My Doctor

Developed this website using modern technologies: - EF, LINQ, MVC, Ajax and SQL

TECHNICAL SKILLS

- **Programming**

- C#
- JavaScript (ES6)
- TypeScript
- C++

- **Database**

- SQL
- PostgreSQL
- Mongo
- Firebase

- **Hands on**

- Docker
- RabbitMQ
- Elastic Search
- Kubernetes

- **Development**

- HTML/CSS
- Angular
- React
- Node Js
- .Net Core
- REST
- Express
- JQuery
- Bootstrap

- **Familiar with**

- MEAN Stack
- MERN Stack
- MVC
- Cross-Platform
- Azure Platform

- **Interested in**

- Clean code
- Design patterns
- Cloud computing

- **AI & Intelligent Systems**

- LLM Integration (OpenAI APIs)
- Prompt Engineering
- AI Workflow Automation
- Structured Data Extraction
- AI Output Validation

- **Version control**

- GIT
